

PRODUCT BRIEF

MT4000

Global Trackers for Location and Management of Powered Assets

The Mobilogix MT4000 is a cellular-enabled IoT device solution with multiple I/O and embedded GPS for Real-time Tracking.

POWERFUL

The MT4000 enables track and trace workflows with installs as simple as 2 wires. With an on-board antenna and 3-axis accelerometer, the device is ready out of the box for powered asset traceability.

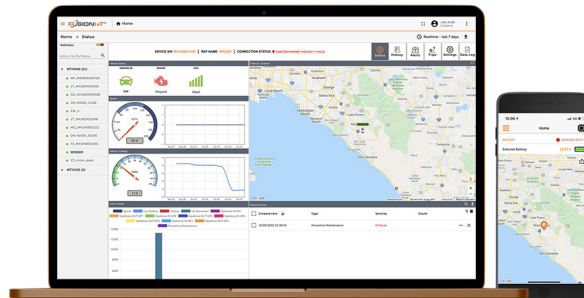

VERSATILE

With multiple I/O configurations the MT4000 Tracker can meet various needs including: Ignition relay, starter disable, door monitor, emergency button and other general I/O needs.

EASY TO CONFIGURE

As an always-on tracker with multiple power source options, the MT4000 device can provide highly granular tracking with configurable location reporting intervals.

Pair with the FUSIONIoT™ Platform Plus Connectivity for a scalable solution that delivers enhanced control in configuring, monitoring and managing assets.

PRODUCT DETAILS

MT4000

Global Trackers for Location and Management of Powered Assets

Common use cases include track, trace and recovery of automobiles, motorcycles, trailers, and other powered mobile assets.

KEY FEATURES

- Real-time Tracking and Notifications
- Starter-disable; Custom Alerts
- IP67 Enclosure for Rugged Field Use
- OTA (Over-The-Air) Updates

FUSIONI_{IoT}™ INTEGRATION

- Secure Web Login
- Native iOS and Android Applications
- Reporting Interval Selection
- White Label Option

Technical Specifications

Antenna	Internal
Cellular Service	LTE (Cat1) Regional Variant, 3G HSPA Global, 2G GPRS Quad Band
GNSS	GPS, Glonass
Sensors	3-axis Accelerometer
Power Input	9-24 VDC
Backup Battery	Li-ion (Rechargeable)
Enclosure	ABS Plastic, Hermetic Integrity rating IP67
Dimension	98 x 51 x 20mm
I/O	1 input, 1 output
Operating Temp	-40°C to +85°C
Regulatory	FCC/IC, PTCRB
Operator	Verizon, US Cellular
Safety	RoHS, CTIA Cybersecurity
Warranty	1 year device material and parts
